

HydroPro™ Hydronic Control Panels are custom designed and precision shop-built using only the finest components. Mounted on a solid HDPE back panel with a bubble level & wall hanger bracket, control panels arrive at the job-site ready for installation.

Radiant Systems	Gas Boilers
Snowmelting	Wood or Coal Fired Boilers
Hydronic Air Handlers	Geothermal
Baseboard Systems	Solar

- Installer ready – as a module
- Custom designed for the project
- Complete drawing set
- Factory built and tested
- Shipped ready for installation
- Finest grade components
- Designed for serviceability, with circuit isolation for easy service and component replacement
- Pre-wired with pumps, actuators, and controls
- Din rail wiring connections

Standard Components

- Belimo Zone Valves
- Caleffi Backflow Preventer/Regulator
- Caleffi Air Eliminators
- Grundfos Pumps
- Azel Digital Temperature Gauges
- Tekmar Controls
- Watts Expansion Tanks
- Watts Ball Valves
- Watts Isolation Pump Flanges
- Modular Electrical Enclosure
- Phoenix Din Mount Connectors and Relays
- HDPE Back Panel - virtually indestructable
- Hanger System
- Copper Piping

Options

- Variable Speed Pumps
- Injection Mixing
- 3-way Mixing
- Modulation
- DDC Control Connections
- Up to 4" Pipe Size
